

TIRED OF THE SAME OLD GRIND?

COLONIAL SAW
MACHINERY SALES AND SERVICE

Park up your moulder knife production with the [UT.MA P20 CNC Profile Grinder](#) from Colonial Saw, the world's first fully automated profile knife grinder.

» **No templates required.** Grind knives direct from CAD drawings.

» **Fast and accurate.** 12-HP grinding motor with variable speed control is five times more powerful than standard manual profile grinders. The quick-change grinding wheel grinds against the cutting edge limiting any burning to the bottom of the grind.

» **Operator safe.** Fully enclosed cabinet eliminates standing over the knife grinding process.

» **Labor saving.** CNC automatically grinds the knives freeing the machine operator to perform other value-added tasks.

» **Skilled knife grinders are hard to find.** CNC attracts the new generation of machine operators.

» **Who owns the UT.MA P20 CNC?** Moulding & millwork companies who grind custom knives in the original heads. Toolmakers mass produce HSS knives, carbide inserts, brozed cutterheads and router bits.

» **When is the investment justified?** If you grind profile tools more than 6 hours a day or are considering buying a second manual machine, you seriously need to check out the [UT.MA P20 CNC Profile Grinder](#).
